Subject: Internal deliberative draft for co-author review
Attachments: 181211 Details on soil and vegetation data.docx

Hey guys,

Attached is a draft on New Jersey project that I have not even reread myself yet but thought I might send up to you for co-author review in case you have some free time on Friday. I am off Friday. I am hoping you are willing to be co-authors but no harm no foul either way. And we can add other authors when the three of us get to talk.

This is plodding and verbose, with the intent of spoon-feeding details for the purposes of the New Jersey project that might be unnecessary for a journal or go to the SI. I am leaning toward asking this to be a report first, then re-working it for a journal manuscript. But this is all contingent on it not getting bogged down in endless review. If it might go thru review unexpectedly quickly as a report, we could remove the maps and generate a later volume 2 with the maps after Drew Pilant's postdoc gets on board.

Anyway, have a great weekend—
John
